FRONT-LINE
WHERE AMERICA'S BUSES GO TO MARKET
650 Red Oak Rd., Stockbridge, GA 30281

Help Wanted is what you see, just about wherever you go! What happened to those that were out of work last year because of the pandemic? Many found other jobs, some are content to spend the unemployment and stimulus with little ambition to move on. Your guess is good as mine where the rest are. We just know they're not looking for the jobs we're offering and need to be filled!

We really do need your help...

BUT WE NEED YOUR HELP! **Our mailing list has dozens, if not hundreds of bus companies listed that are no longer active, but we have very little chance of knowing which ones are and are not. Even the Post Office is lacking either the time or interest in sending corrections! For us to survive, we MUST KNOW who needs us to mail, and who ha s gone by the wayside. Please take just a few minutes and let us know who in your area is no longer active. Email: addesk@frontlinebuses.com or call.**

Like most all the motor coach industry, we have been almost on standstill since early in 2020. We now see a lot more movement both in passenger travels, and in sales and trading buses and believe it's time to let's move on.

Let's all do our part, move every thing we can until we see the industry moving at near 100% in the coming months and put this awful season behind us for good!

DATTCO SALES & SERVICE

770-474-1150

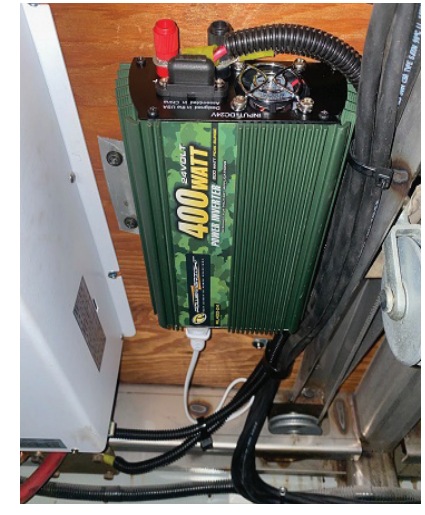
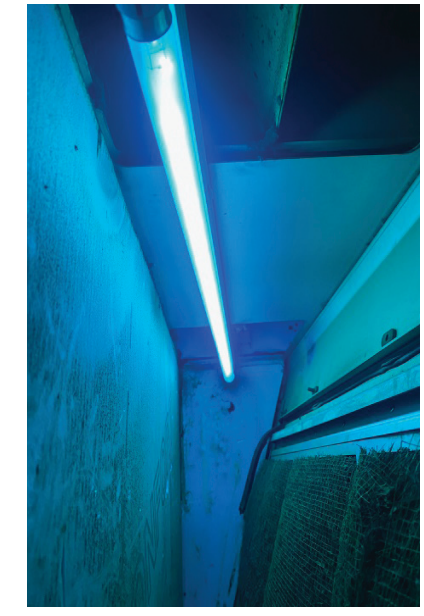
VIRUCIDAL - GERMICIDAL LAMP

Installation Kits Available

We highly recommend installing new UV-C lamp systems in your coaches. Not only does it help protect both passengers and operators from viruses, including Covid-19, but it destroys many harmful bacteria which contribute greatly to corrosion of evaporator coils in your coach, thereby helping to maintain efficiency and longevity.

They are not difficult to install, the average mechanic can install with ordinary hand tools. They are effective, automatically operate when HVAC system is on AC or heat setting. Very little power is used and no regular maintenance is needed except replacing bulbs once a year.





Above photo shows UV-C bulb as installed in an MCI J-4500 coach. On the left shows the power supply installed overhead in the baggage compartment. System is energized from blower motor connections, so that operation is automatic.
The UV-C light is invisible to the eye, but the bulbs also emit a "bluish" tint light as a by-product of the bulb emitting the correct invisible wave-length light that actually does the work. As installed, the light cannot be seen by anyone while on, it is hidden in the evaporator compartment of coach.

Ultraviolet light in the UV-C wave-length is invisible to the eye, but it is also damaging to eyes and skin. Proper protection should be taken when installing and maintaining light systems.

COMPLETE INSTALLATION KITS

Includes power supply, light fixtures, bulbs, necessary electrical, wire etc. and easy-to-follow instructions.

Kits for other coaches to follow shortly.

MCI J-4500 coach -- $265.

MCI E- coach w/twin evaporators - $345.

Prevost H3-45 coach -- $265.

Van Hool T2145 coach -- $425.

WELCH INDUSTRIES

770-474-1150

650 Red Oak Rd., Stockbridge, Ga. 30281

Kits include a placard to advise of the installation - can be placed near door on outside or as desired.

This Coach Equipped With
Virucidal-Germicidal
Ultra Violet Radiation
Disinfecting System.
This works unseen through the HVAC system to help keep the coach interior clean and safe from viruses and harmful germs.

FRONT-LINE

WHERE AMERICA'S BUSES GO TO MARKET

650 Red Oak Rd., Stockbridge, GA 30281

WWW.FRONTLINEBUSES.COM

FRONTLINE has been published since 1982! For many years it was printed as a black and white publication twice monthly. Since February of 2019, we transitioned to monthly with full color on enamel paper which greatly increases visibility, clarity and definition to buses and offers greater attraction and value to advertisers.

Our goal is to reach the entire motor coach industry with timely advertising for motor coaches and related products and services. We now mail to well over 4,000 companies in all 50 states. Our list is maintained regularly as operators come and go. *We reach the motor coach market in the United States!*

ALL SIZES and TYPES of buses are advertised from time to time. Small buses, large buses, older buses, newer buses. Take your pick. Businesses for sale show up regularly also. If it's connected to the motor coach industry in the United States, here is where you will find it! Printed and on the web: FRONTLINEBUSES.COM
